

Inelco Hunter Ltd- Environmental Policy

Inelco Hunter recognises the value and importance of protecting the global environment. Our basic environmental philosophy is:

"We shall adapt our corporate activities to improve our coexistence with the environment."

As an enterprise we are a specialist value added distributor providing specialist design-in, sales & marketing, logistics and value added services for our international suppliers in the following areas:

Electronic Components - relays, connectors, thermal printers, input devices, circuit protection, fans and fan assemblies, LCDS, TFT Touchscreen solutions and other components, our current environmental management is based on the following principles:

1. We endeavour to promote environmental management in accordance with ISO14001.
2. We endeavour to promote environmental protection and continuously work to improve our environmental management programs.
3. Our activities, products and services comply with environmental regulations.
4. We endeavour to conduct the following major activities (among environmental aspect obtained through our activities, products, and services):
 - Promote purchasing Green Products (eco-friendly products) and purchase parts and raw materials from suppliers who have an established environmental management system (EMS)
 - Provide the most advanced eco-friendly products, so called "Super Green Products", by considering environmental impact from the R&D stage
 - Eliminate hazardous substances in our products.
 - Reduce CO2 generated by energy consumption
 - Reduce emissions of chemical waste (PRTR directive substances)
 - Achieve zero emission of waste and reduce waste further

These principles are documented and made public to our employees, our group members and other parties concerned.
